Workbook: My Hearing Technology Checklist

Part 1: Where do I need more help?

Check the areas where hearing is difficult.

- ☐ Phone calls
- ☐ Video calls
- ☐ Television
- ☐ Restaurants
- ☐ Family gatherings
- ☐ Work meetings
- ☐ Medical appointments
- ☐ Religious or community events
- ☐ Public announcements
- ☐ Doorbell
- ☐ Alarm clock
- ☐ Smoke alarm or carbon monoxide alarm
- ☐ Timers
- ☐ Hearing in the car
- ☐ Hearing one speaker far away
- ☐ Hearing in public spaces
- ☐ Other: _____

My top three technology needs are:

1. ---
2. ---
3. ---

Part 2: Tools I want to ask about

Check the tools you want to discuss with your audiologist.

- Remote microphone
- TV streamer
- Wireless TV headphones
- Bluetooth hearing-aid streaming
- Captioned telephone
- Smartphone captions
- Video-call captions
- Speech-to-text app
- Visual doorbell alert
- Vibrating alarm clock
- Smoke alarm or carbon monoxide alerting device
- Telecoil
- Hearing loop systems
- FM or infrared public listening systems
- Hearing-aid app
- Other: _____

The tool I am most interested in is:

Part 3: Matching the tool to the problem

Complete the chart.

My phone problem is:

Possible tool or strategy:

My TV problem is:

Possible tool or strategy:

My background noise problem is:

Possible tool or strategy:

My safety alert problem is:

Possible tool or strategy:

My public space problem is:

Possible tool or strategy:

Part 4: Questions for my audiologist

At my next appointment, I want to ask:

- Do my hearing aids connect to my phone?
- Do my hearing aids connect to a TV streamer?
- Would a remote microphone help me?
- Do I have a telecoil?
- How do I use a hearing loop?
- What captioning tools should I try?
- What can help with phone calls?
- What can help with television?
- What can help with restaurants or meetings?
- What alerting devices should I consider?
- Can you show me how to use the device?
- Are there lower-cost options?
- Can I try the technology before buying it?

My most important question is:

Part 5: Before I buy a device

Before buying, I will ask:

- What problem does this solve?
- Does it work with my hearing aids?
- Does it work with my phone or TV?
- Is it easy for me to use?

- Does it need charging?
- Does it need an app?
- Can I return it?
- Is there customer support?
- Can my audiologist help me set it up?
- Is there a simpler option?

The device I am considering is:

What I need it to help with:
